

Soufiane Mghanen

Profile

Enthusiastic Software Engineer with 6+ years of experience working in both start-ups and international corporate industries. With exposure to the complete product development lifecycle, I am eager to apply and share what I have learnt into more successful projects. Looking for opportunities in an environment where I can develop and grow further as an individual and a professional.

Key Skills

- + Full stack development - comfortable working with both Backend and Frontend stacks.
- + Strong understanding and practice of Agile methodologies to ensure effective feedback loops are established with the end client.
- + Work across functional and project teams to ensure continuous operation of build and test systems.
- + Proactively seek opportunities to improve internal team processes and toolset usage.

Recent Technology Stack

- + **Backend:** goLang, python, PHP, GraphQL, Django, Celery.
- + **Frontend:** HTML5, CSS3, ReactJs, Redux.
- + **DEVOPS:** Git, Docker, Kubernetes, TravisCI, AWS, GCP, Helm, Istio.
- + **DATABASES:** PostgreSQL, MySQL, Redis, Mongo, Elasticsearch, RabbitMQ.
- + **SYSADMIN:** CentOS, Bash scripting, Windows Server, Powershell.
- + **SDLC:** Scrum, TDD, Kanban, Jira.

Employment History

Jan 2017 - May 2019

FullStack Engineer - Schibsted Media Group

Main technology used: GoLang, PHP, ReactJs, PostgreSQL, Redis, Elasticsearch, C++.

- + Contributed to an atmosphere of cross-functional teamwork within the organization's emerging Agile delivery lifecycle.
- + Contributed to the efforts of the company to migrate towards a microservices oriented architecture.
- + Collaborated with cross teams, engineering and product managers to design, build and deliver scalable solutions.
- + Participated in identifying and improving performance bottlenecks in the existing stack.

Apr 2015 – Dec 2016

FullStack Engineer - CapValue Consulting

Main technology used: Python, Django, DRF, PostgreSQL, Redis, RabbitMQ, Angular.

- + Designed and implemented a scalable distributed task processing infrastructure.
- + Designed and implemented a REST API to manage task queuing and access results.
- + Designed and built a Single Page Application as an interface for working with tasks.
- + Configured CI/CD pipelines to manage code and deployments.
- + Mentored and pair programmed with a small team of junior developers.

Nov 2013 – Apr 2015

IT Support Technician - Marjane Holding

Main technology used: Active Directory, Powershell, Bash, File Servers, Gold ERP.

- + Provided desktop support, account maintenance and printing assistance.
- + Prioritised and managed many open cases within agreed time limits to callouts.
- + Installed and configured computer hardware, operating systems and applications.
- + Monitored and managed backups and restores for multiple application servers.

Nov 2012 – Jul 2013

Junior Software engineer - IHM Technologies

Main technology used: C#, ASP.Net, Microsoft SQL Server, Drupal.

- + Attended meetings with clients and discussed their requirements and proposed solutions with the project manager.
- + Contributed to time and resource estimates to assist in the planning of projects.
- + Worked as part of a small software development team to produce technical work, as directed by the project manager and the software team leader.
- + Worked closely with other senior engineers to develop the best technical design and approach for new product development.
